

# Systemic lupus erythematosus (SLE)

Version: 3.0

Published: 20 October 2018

Condition for which IVIg is not supported.

## Specific Conditions

- Systemic lupus erythematosus (SLE)

## Level of Evidence

Evidence of probable benefit – more research needed (Category 2a)

The use of Ig therapy is not supported in Systemic lupus erythematosus (SLE) because preferable alternative therapies are available for the treatment of this condition.
