

# Narcolepsy/cataplexy

Version: 3.0

Published: 20 October 2018

Condition for which IVIg is not supported.

## Specific Conditions

- Narcolepsy/cataplexy

## Level of Evidence

Insufficient data (Category 4a)

Ig therapy is not supported for narcolepsy/cataplexy because there is insufficient evidence of benefit and preferable alternative therapies are available for the treatment of this condition.
